- It is often said that the city's name comes from the Quechua phrase "Ari, quepay" which means "Yes, here" which is said to have been the response of the Fourth Inca - Mayta Capac - upon seeing the site of the great city.
- Nowadays it is assumed that the name derives from Aymara language- "ari" (peak) + "kipa" (locative) and means something like "near the mountain" in reference to the nearby volcanoes: Misti and Chachani..
- Arequipa is influenced by Spanish colonial ideas and architecture.
- While visiting Arequipa, our package allows you to visit the most popular tourist attractions: Plaza de Armas, Temple and plaza of San Francisco, the Convento de Santa Catalina and more.
- El Misti volcano towers 5822 meters high above the second city of Peru, Arequipa, with a population of more than one million.

Day 1:

We will depart from Arequipa at 7:30 am and begin a trip up Misti. We will stop at our camping spot which is 4610 meters up the mountain. Here we will have dinner and rest to begin again in the morning.

Day2:

Early morning we will eat breakfast and again journey up the volcano. While heading up the volcano, we will have a spectacular view of the volcano and the city of Arequipa. By noon we will make our way back down the mountain, and arrive to Arequipa in the evening.
